ModuleWorks
Get There Faster.

Your career at ModuleWorks

ModuleWorks develops software components for the CAD/CAM industry that are used to control and simulate CNC machines and robots. With over 150 employees and more than 50% of the global market share, ModuleWorks is the leading company in this sector. To strengthen our team, we are looking for an

Algorithmic Developer (f/m)

Your profile
- Advanced knowledge and experience in C++
- Experience of geometric algorithms
- Experience of software architecture and large projects is an advantage
- Self-motivated, flexible team player
- Good knowledge of English

The position
We are a team of software developers working on algorithms for processing 3D geometries. We use sophisticated mathematical concepts, 3D data structures and algorithms as well as modern development tools. Our software is used in computer controlled production processes, and we continuously strive to offer our customers new possibilities in this field.

We are looking for a software developer to work on our Multi-Blade product range to develop toolpath planning software for manufacturing impellers and blisks. Multi-Blade products are used, for example, in the aerospace, automotive and energy sectors.

What you can expect from us
At ModuleWorks you will find a friendly working atmosphere in an international and young team. We do not believe in strict structures and rigid ways of thinking, but instead offer diverse tasks and encourage flexible development that goes beyond flexible working hours and home office. Interested? Then get in touch with us! **We look forward to your application.**

Only complete applications will be accepted for the application process.
